

## INTEGRATED MANAGEMENT POLICY

### **(Environmental Management, Quality and Health and Safety at Work)**

Did Automation S.L. is a company specialized in the design and installation of automation, industrial maintenance and Computer Applications, is committed to the implementation, in all its activities, a policy that allows you to assure their customers of the highest possible degree of satisfaction, being the foundation of their behavior of value creation, the commitment to the ethical criteria applied, respect for the environment, as well as the protection of workers against risks that could compromise the safety and health at work.

The policy of our Integrated Management System, not only the aspects directly related to the design and installation of automation, industrial maintenance and computer applications, but also the set of relations that unite us with customers, employees, suppliers, partners and social environment and with the aim of providing all security and confidence in our company, in the framework of a constant desire to improve our management systems that have a point of reference in order to establish and review the targets.

A true culture of prevention, requires that the management of the quality, of prevention, respect for the environment in all its manifestations, in the safety and health of workers, in each of the phases of the productive chain (and not only at the time of the risk assessment), integrated management across the hierarchical structure of the company, as it is taken into consideration and valued to negotiate with the client the conditions in which it has been to provide the service.

Our goal is that our products/services are characterized and have as a sign of identity, as opposed to other competitors, our commitment to comply with all the rules applicable in all chapters of the integrated management policy, together with all the internal regulations applied in our company, which provides for periodic internal audits as well as independent audits to perform and ensure the effective implementation of these regulations, and all of this in both the external relationships as in the internal company and in all the actions of our employees, who have signed a commitment to implementation of all these principles with the consequent responsibility to put them into effect.

In our company we care about the quality of our products, our brand DEIDE, certify that all their products comply with the UNE-EN-ISO 9001:2015 (Quality Management Systems). All our machines comply with all the provisions applicable to the Directive 2006/42/EC and are in line with the Community directives. Management and all the staff DID AUTOMATION, acquire the firm commitment to meet the customer's needs, from the application of the criteria defined in this policy.

Management understands that the prevention of labor risks is an integral part of the management of the organization. For this reason, is committed to reaching the maximum level of safety and health at work in compliance with the legislation on this matter, and based on the principle of continuous improvement of preventive action.

In our company, we are aware of the commitment with our environment, we are committed to the environment in all aspects of our business and we have implemented the necessary basis to ensure that the objectives of the corporate policy are able to meet the criteria necessary for the care of our environment and the preservation of the environment.

In addition, DID Automation S.L., meets and ensures compliance with all the rules of the law of protection of personal data, LOPD (Law of Data Protection, Spanish Organic Law), particularly sensitive and relevant in the field of their activity.

Finally, I would like to encourage all who are part of this company and all that with them, by one or another title have relationship, to take an active part in our commitment to quality, the environment, energy saving and safety and health at work. In addition, that this commitment to reach the general knowledge is available to all the documentation on our website: [www.didautomation.com](http://www.didautomation.com). We encourage all interest groups to send us their suggestions using our contact section of our website.
